

IN THE CLAIMS:

1. (Previously Presented): A method for information handling within a document created using a first application program comprising the steps of:

entering a first information in the first application program;

marking without user intervention the first information to alert the user that the first information can be utilized in a second application program; and

responding to a user selection by inserting a second information into the document, the second information associated with the first information from a second application program.

2. (Currently Amended): The method of claim 1, wherein the user selection further comprises an activation a device selected from a group consisting of a touch screen, a keyboard button, a screen button, an icon, a menu, and a voice command device ~~or other standard user interface device~~.

4
3. (Original): The method of claim 1, wherein the step of inserting the second information into the document further comprises the steps of:

initializing the second application program;

searching, using the second application program, for the second information associated with the first information; and

retrieving the second information.

5
4. (Original) The method of claim 4, wherein when the second application program includes second information associated with the first information, performing the further step of displaying the second information.

7
5
5. (Original): The method of claim 4, further comprising the step of:
completing at least one of the first and second information in the document.

10

6. (Original): The method of claim 1, wherein the first information comprises a name.

12

7. (Original): A computer readable medium, including program instructions, for performing the method of claim 1.

13

8. (Previously Presented): Electromagnetic signals propagating over a computer network, the electromagnetic signals carrying information for practicing the method of claim 1.

3

9. (Previously Presented): A computer readable medium, including program instructions, for performing the method of claim 2.

6

10. (Previously Presented): A computer readable medium, including program instructions, for performing the method of claim 3.

8

11. (Previously Presented): A computer readable medium, including program instructions, for performing the method of claim 4.

9

12. (Previously Presented): A computer readable medium, including program instructions, for performing the method of claim 5.

11

13. (Previously Presented): A computer readable medium, including program instructions, for performing the method of claim 6.

14. (Previously Presented): A method for information handling within a document created by a first application program comprising the steps of:

entering a first information in the first application program;

marking without user intervention the first information to alert the user that the first information can be utilized in a second application program; and

responding to a user selection by performing an operation related to a second information, the second information associated with the first information from the second application program.

E 15. (Previously Presented): The method of claim 14, wherein the first information is a name, and the operation performed is selected from a group consisting of an electronic mail, a telex, a facsimile or a letter addressed to the name indicated by the first information.

16. (Previously Presented): The method of claim 14, wherein the operation performed is entering additional data into a database.

17. (Previously Presented): The method of claim 16, wherein the additional data is entered by a user.

18. (Previously Presented): The method of claim 16, wherein the additional data is located within the document.
